

Full description of the invention

The full description of the invention includes:

(Previous art - problem or shortcoming in previous art - detailed description - method of exploitation)

((** The device searches for the remote control through the TV **))

Explain the idea

* It is a device that shortens the search for the remote control with an audio alert indicating the location of the remote control when losing the remote.

* How the device works is a device added to the TV that is connected to the remote control when the TV is turned on.

Determines the location of the remote control by making a sound from the remote control, which helps to search for it when it is lost.

Detailed description:

Including the method of operation in cases of devices, tools and equipment, or the method of chemical preparation in cases of chemicals and Agricultural, laboratory experiments, and side effects.

I always go to the coffee shop and they have smart flat LCD TVs, I always go to the café, there are places designated for each person, and if I go to the café I watch and notice that many people are complaining about the problem of not having a remote control in the same places designated for each individual,

The idea saves from the great trouble of searching for the remote control device if it is lost anywhere

Whether it is in the cafe, at home, in the company, or anywhere, it is not confined to one place

Certain, but benefit everyone who has a modern type of LCD sensitive TV and of any other type.

This idea saves a lot of research and trouble in the end.

Among these people, the problem was not only suffered by the owner of the café.

The cafe and the cafe customers who frequent it from time to time have an idea of it over and over again, what is the problem of losing and stealing the remote control and solving the problem that it suffers from The owner of the cafe and the customers of the cafe suffer from it.

Exploitation method:

In the end, I was thinking, as I grab one of the remote control and check it inside and out for you I came to a final solution to the problem and adopted my best solution to this problem. I went to the market In order to solve the problem, I went to a place designated for games. I went and bought a phrase game Remote control car.

New items to protect:

The first element:

Sound alert when the device is lost and search through the TV and there is a sound device in the game there was a warning, so I opened the pieces of the game and took the device that specializes in the sound that the game emits, then it connects Between the piece and the remote from the inside of the remote control with the sensor device that is inside the game.
